

Stone Arch Bridge

The Tusten Stone Arch Bridge was constructed in 1896 by William H. Hankins, a local timber raftsman, stone mason and occasional postmaster. The bridge crosses the Ten Mile River just northeast of its confluence with the Delaware River. It is approximately 52 feet long and 15 feet wide and continues to operate as a single lane vehicle bridge for local traffic. The bridge is

named in honor of Dr. Benjamin Tusten, “an American militia volunteer and physician, who was killed as he ministered to the wounded at the Battle of Minisink on July 22, 1779 less than ten mile to the south of this settlement.” (1) The bridge and the surrounding land has been owned by the Boy Scouts of America since 1927 for their use an educational camp. Fortunately, through an agreement with the National Park Service, the bridge is publically accessible along the beginning section of the 3-mile Tusten Mountain Trail, an interesting hike with outstanding Upper Delaware Valley scenery. The bridge is listed on the National Register of Historic Places.
